

military technical college (mtc): established in 1957 military technical college is considered one of the distinguished scientific research centers of the armed forces military technical college is specialized in the fields of military sciences and technology as a reference in the military technical applications military technical college is in charge of graduation of military technical college engineering officers of scientific practical and organizational capabilities to undertake the technical and engineering missions qualification of distinguished officers to conduct scientific research innovation in diverse engineering and technological fields so as to help the armed forces modernize the armament systems and support critical and advanced technologies directing the scientific and technical post graduate studies in compliance with the needs of the armed forces awarding the diploma msc and phd degrees in the engineering and scientific fields qualification and preparation of officers to work as staff members conducting academic and applied researches in relation to fields of studies and researches in accordance with the general strategies of the armed forces technical researches conducting new studies that fulfill the needs of armed forces proposing new engineering and technological solutions that promote the capabilities of the military equipment and improve their tactical and technical utilization preparation of qualified officers who can offer technical consultations to armed forces authorities cooperation with other departments to plan and develop the technical and engineering education to ensure the best quality of the scientific and technical information meeting the current and future needs of the armed forces evaluation of the scientific degrees and equivalent studies in engineering sciences from foreign universities in cooperation with the ministry of higher education and recommendation for scientific titles to achieve self-sustainment of the armed forces in the fields of technology and engineering by providing engineering officers and researchers who can build and maintain armament systems and fulfill the needs of the army operations military technical college aims to become one of the best international competing institutions in the fields of research education and knowledge moral principles should consider the belief in god and the full faith to the nation a major principle is the profound trust in the capabilities of the Egyptian people their willingness to sacrifice for the sake of distinction dignity and independence of their beloved country

research centers availability: no

number of students:

number of staff:

gender: male

rating: 500

type: public

electrical engineering branch at military technical college (mtc): electrical engineering

branch is one of the departments found in military technical college in Egypt

mechanical engineering branch at military technical college (mtc): mechanical engineering

branch is one of the departments found in military technical college in Egypt

chemical engineering branch at military technical college (mtc): chemical engineering branch

is one of the departments found in military technical college in Egypt

naval engineering branch at military technical college (mtc): naval engineering branch is

one of the departments found in military technical college in Egypt

aerospace engineering branch at military technical college (mtc): aerospace engineering branch

is one of the departments found in military technical college in Egypt

civil and architectural engineering branch at military technical college (mtc): civil and

architectural engineering branch is one of the departments found in military technical college in Egypt

basic sciences branch at military technical college (mtc): basic sciences branch is one of the departments found in military technical college in Egypt

humanities and military subjects branch at military technical college (mtc): humanities and military subjects branch is one of the departments found in military technical college in egypt
